COVID-19 REMOTE PATIENT MONITORING (RPM) PATHWAY

create Prehos + referral received in MS Teams CPintake email account; upload referral determine: completed by secretary or CP basic eligbility **TRIAGE LEVELS** scheduling coordinator weekdays, **COVID** status RPM medic weekends + holidays isolation dates **HIGH RISK** - priority admit to RPM moderate to severe dyspnea at any age <65 + risk factor(s) + mild dyspnea * immunocompromised + mild dyspnea create "RPM Referral" task in **MODERATE RISK** - admit if capacity **Prehos** < < 65 + more than 1 risk factor</pre> * 2-18 mild dyspnea + chronic condition(s) **LOW RISK** - educate and non-admit

contact patient;

determine triage

level; consent

admit to

RPM?

yes

complete admit

processes

on program

ISOLATION DATES

BASIC ELIGIBILITY

COVID STATUS

pending (PCR or RAT in progress)

presumed (symptoms, not tested)

**pending and presumed - notify referral

source that patient must have positive test

to be on program - advise to re-refer if test

1. within geographic area

4. can manage technology

positive (PCR or RAT)

2. age >2 years 3. COVID positive

is positive

Complete Prehos task + note

- D/C from Prehos + MS Teams

- Inform referral source

5 days + improving x24h/48h for GI: >12 yrs and fully vaccinated <u>or</u> <12 yrs regardless of vaccination status

10 days: >12 yrs partially or unvaccinated or any immunocompromised person regardless of age or vaccination status

day 0 = symptom onset or positive test (PCR or RAT) - whichever came first

MEDICAL OVERSIGHT

2-17 yrs - contact Medical Director (Prpic) for initial approval and ongoing management

18-64 yrs - contact on call for Prpic/ Gibb/Symington group

65+ vrs* contact on call for Clarke/ Chau/Sheridan group *OTN no longer required on admission

ON PROGRAM PROCESS

- 1. daily review of patient submissions + minimum once per day phone check in 2. document in Prehos using Progress Notes for routine info and Clinical Notes for significant events/alerts or assessments
- 4. manage alerts follow up on alerts with patient per established Escalation Pathways
- 6. follow up on patients who have not submitted values on any given day per Not Seen Not Found policy
- events to primary care (fax/phone)
- 8. assess for discharge as per Pathway

- 3. log patient visits/calls in MS Teams
- 5. troubleshoot technical issues

* >65yrs

<65 + mild dyspnea

symptoms, 0-1 risk factors

CKD; obeisity; pregnancy

referral task

<65, vaccinated, no dyspnea, no GI</p>

RISK FACTORS: immunocompromised and/or cancer; dementia/neurologic condition; organ/stem cell

transplant; smoking; diabetes; COPD; CHF; stroke/TIA;

ADMIT PROCESS

1. create/update prehos account + complete

2. create/update MS Teams account

4. complete in-home set up/assessment

3. create FutureHealth account

5. clinical note in Prehos

- 7. communicate significant changes or

DISCHARGE PROCESS

- 1. pick up and disinfect equipment
- 2. discharge note in Prehos
- 3. fax discharge summary/note to primary care
- 4. send survey link to patient
- 5. discharge patient from Prehos, MS Teams and FutureHealth Platforms

(daily monitoring + alert management) assess for discharge: 1. day 7 (since symptom onset) 2. pt reports symptoms resolving (whichever occurs first) symptoms discharge from RPM program resolving? no extend RPM isolation completed? monitoring x3 days yes symptoms home visit/assessment resolving? -no by CP (day 10) no yes Work with primary care discharge from on follow up plan RPM program (ie office visits, transfer to CPLTC or CP high intensity)

ESCALATION PATHWAYS

911 response: medically unstable, requires emergent care and transport

MOP consult: change in patient condition which requires medical

OTN consult: upon MOP request for assess and advice

JIT visit: acute change in condition (not requiring 911 response, potential for intervention, and/or to assess prior to MOP involvement) Home Visit: as per pathway (ie not improving, discharge planning); equipment failure; sub acute change in condition

Phone Consult with patient: alert management, change in condition Paramedic Referral: to external agency for identified unmet needs **Primary Care Referral**: Low acuity, out of CP or RPM program scope **ACP CP**: assist with point of care labs or urinalysis testing as ordered by MOP
