RE: 2017164 Spectrum DNA Solution – Shelf-Life Extension

To Whom It May Concern,

Part number 2017164, Spectrum DNA Solution – 2.1cV3 lot number with expiration dates of 03/2023 or earlier, are recommended to have their expiration dates be extended by 1 year. This is based on the re-test results along with real time and accelerated stability results from current testing. Critical concentrations of EDTA, SDA and Guanidine Thiocyanate were tested over the effective 3-year period. Supporting documentation can be found in test report ENG-RPT-310 v2.0.

If you have any further questions regarding the testing or the extension of the Spectrum DNA Solution – 2.1cV3, please contact your account manager.

Thank you,
